Additional Guidance for the Health Sector
The Health Sector and the matrix Standard

Introduction

The NHS Constitution for England highlights the importance of workforce development and support:

“The NHS commits to provide all staff with personal development, access to appropriate training for their jobs and line management support to succeed”

High quality information, advice and guidance is core to this achievement and the matrix Standard can help managers achieve this goal.

Ensuring that those working in healthcare are maximising their skills, not only benefits patients, service users and employees – it also makes sense from a business perspective. Organisations that invest in the skills of their people typically report that employees are more productive, better motivated and demonstrate higher levels of loyalty. There are benefits for recruitment and retention too and the best talent will always opt to join an organisation in which they can fulfil their potential. Those with the right skills and competences are more able to deal with change – essential within modern day health when a greater flexibility is required and as new roles and working practice are developed.

Whilst the healthcare sector has made great strides in encouraging employees to access and progress through the career framework, improve skills and competences, and encourage personal and organisational development there is always more that could be done.

The need for high quality Information, Advice and Guidance has never been greater. Effective Information and Advice supports individuals and signposts their progress at every stage of their professional and work related development. Its purpose is to ensure that people are informed about what options are open to them; both in terms of taking up a career in the healthcare sector or, if they are already working in the sector, in relation to how they can move forward in their job or their learning. It is equally important that such information is consistent, uses resources efficiently, matches skills with needs and motivates employees.

Over the past decade the health sector has embraced the matrix Standard as a framework to help improve an organisation’s business development. The matrix Standard has acted as a core tool in supporting many Trusts to effectively implement their workforce development strategies to improve outcomes for the workforce.

The matrix Standard complements the NHS Leadership Framework and enhances existing quality standards that many health sector employers have already achieved or are considering, such as Improving Working Lives, the Health and Wellbeing Good Practice Award and Investors in People. It also supports the QIPP plans and the development of a lean management approach.
The matrix Standard recognises the pressures faced by the health sector and its flexibility means that it may not involve any extra paperwork. The matrix standard can help the health employer identify and communicate its top level workforce development objectives and provide the framework to realise planned outcomes.

Benefits cited by matrix Standard accredited health employers have included:

- **Establishing a departmental plan** that is focused upon making a difference and achieving outcomes for employees that in turn help the health employer realise wider organisational objectives (element 1)

- **More effective deployment of resources** – ensuring that training and development budgets are maximised to help a health organisation achieve organisational strategic goals (element 2)

- **Motivated employees** - providing impartial high quality support that has led to staff feeling increasingly motivated and empowered to continue on their professional and personal development pathway (element 3)

- **Capturing results and impact** – by reviewing practices against set objectives workforce development organisations have been able to show that the training and development support is making a difference and showing a return on investment (element 4)

This guide has been written for all health sector employers. At times the reference may be leaning towards the NHS but the matrix Standard is flexible enough to apply to all employers within the sector.

---

**What is the matrix Standard?**

The matrix Standard is the unique quality framework for the effective delivery of information, advice and/or guidance that supports individuals in their choice of career, learning, work and life goals. It promotes the delivery of high quality information, advice and/or guidance by ensuring organisations review, evaluate and develop their service, and that they encourage both the take up of professionally recognised qualifications and the continuous professional development of their staff.
What is the structure of the matrix Standard?

The matrix Standard comprises of four elements:

1. Leadership and Management
2. Resources
3. Service Delivery
4. Continuous Quality Improvement

Each element contains criteria, all of which need to be met in order to achieve the Standard. The following narrative outlines the elements that make up the matrix Standard and provides some suggestions on how to use the Standard to maximise the outcomes of your organisation’s service.

The ‘What this means’ section found within each element highlights the flexibility of the matrix Standard. The Standard is non prescriptive and organisations can and do provide a range of outcome based evidence to show the effectiveness of their services. Where appropriate we have also provided some additional guidance that, whilst non prescriptive, may help you to consider the types of evidence to show and tell your Assessor. The ‘examples’ columns provides guidance set in the context of Health Sector organisations, using terms that are commonly found in this sector.

The planning of every assessment is tailored to suit each organisation; your Assessor will ensure their approach to evidence gathering is in line with your service management and delivery.

The following are key terms used throughout the matrix Standard:

**The Organisation**
This refers to the body which manages, administers and delivers the service and has applied for initial accreditation or accreditation review against the matrix Standard.

**The Service**
This is the information, advice, and/or guidance provided by the organisation to support individuals in their choice of career, learning, work and life goals.

**Clients**
This refers to people who access the service, whether they are employees of the organisation or external users of the service.
The Assessment Approach

The matrix Standard is an outcome based standard. This means that as an organisation seeking Accreditation you will need to evidence not only what you do, but how you are measuring your successes, or, in other words, the impact of your organisation’s service.

As you explore closely the requirements of each element, you should be able to provide evidence where you are already demonstrating outcome based examples as well as highlighting areas where there may be need for improvement.

When reviewing your organisation’s service against the matrix Standard in the following pages, ask yourself the following questions:

• How well are we doing?
• What are our priority areas for attention?
• Who needs to do what, by when and with what resources?
• What can we show to an Assessor as part of an assessment or review?

Primarily your Assessor will use interviews as the focus of evidence collection and, as such, your assessment will be planned to include a selection and diverse range of people. The process will include one-to-one interviews with managers, group interviews with clients/staff/volunteers and telephone interviews with partner organisations.

Whilst having processes in place may be important, these do not necessarily lead to the defined outcomes. It should be noted that Assessors are more interested in what examples managers and staff are able to provide to demonstrate that they clearly understand the requirements of the criteria in order to make a judgement.

Additional Support

For further information about working with the Standard please visit the matrix Standard website at: www.matrixstandard.com

On the site there are a range of resources available to assist you such as:
• A self-assessment tool
• A costing model
• A search function for working with a Registered matrix Advisor
• Downloadable documents including the matrix Standard guidance leaflet, commitment form and a copy of the booking form

Alternatively you can contact emQC Ltd directly using the online enquiry form on the matrix website, by calling 0845 304 8600 or via matrix@emqc.co.uk
Terms used
In the context of the wider health sector when working with the matrix Standard the terms service and clients is likely to mean the following:

Service
The support you provide to employees to help them make informed choices in learning, job progression etc. this may include some of the following:
- The Personal Development Review or appraisal
- Support accessed as part of the Knowledge Skills Framework activities
- Telephone, intranet/website help and signposting
- Corporate induction
- Support throughout a learning programme at induction, during the programme and at exit

Clients
These are likely to be (the list is not exhaustive):
- Employees of the trust
- Sub contracted staff
- Students on placement
- Clinical and non clinical staff
- Apprentices
- Employees undertaking learning
- Union members supported by union learning representatives
- Volunteers
- Health service users
How might the matrix Standard apply to your service?

The matrix Standard has already been effectively used as an improvement framework to support workforce development activities across a broad range of health and social care settings.

The matrix Standard is relevant to your organisation or department if it does any of the following (this list is not exhaustive):

- **Provides information about learning and development opportunities** – for example training leads ensuring that staff are on an appropriate course of training or learning with the right support.

- **Has responsibility for carrying out appraisals** - for example as part of KSF practices your personal development reviews may include examples of training opportunities available within your organisation or available externally.

- **Provides information on jobs or careers** – this information may be within a course directory, website, newsletter or be a as part of supervision or one to one discussions.

- **Advises/ guides people about job or careers progression** – provides support to individuals on how they might progress in their current role or explore future aspirations for an alternative role.

Below are just some key points at which support on learning and work is most necessary when providing workforce development:

- **Entry to the health sector** – accurate information and advice can help to ensure that recruitment is at the right point and to a role that is appropriate to both the individual and the organisation.

- **Staff induction** – support for new staff members at the induction stage helps individuals understand their role and their entitlement to services to help them perform competently within the workplace.

- **Initial Assessments** including Skills for Life- any assessment of need needs to be supported with information and advice to remove any fear factor and ensure the individual is motivated to have the skills and support to function at the level required within their job role.

- **Appraisals/Performance Development Reviews** - staff performance reviews and plans for the future often include identified areas for continuous professional development. These reviews and appraisals are better understood when support includes appropriate information and advice.

- **During the learning process** - helping to ensure that the learning which is taking place is appropriate to the individual and the needs of the organisation.

Remember that whatever terminology your organisation uses to describe this activity, whether it is IAG, workforce development support, help, information and advice - the matrix Standard principles remain the same and the framework will help you improve the service you provide.
Why is good quality Information and Advice so important to the health sector?

The healthcare sector requires an active, productive and flexible workforce in order to meet a number of challenges that lie ahead. These include the changing nature of:

- Demand for healthcare services – incorporating the effects of demographic changes; the increase in public and patient expectations; growth in community based care and on-going technological advances

- The supply of healthcare services – including changes in the composition of the workforce; adjustments in working patterns; improvements to productivity; changes driven by technological improvements and the drive to promote more and better self care and better use of the workforce

- Professional practice – incorporating the need to develop new skills; placing a greater emphasis on team working, including changes in accountability, leadership and independent practice; and taking into account changes in the relationships between clinicians and managers.

The matrix Standard ensures that high quality Information and Advice support employers in meeting these challenges.
### 1.1 The service has clearly defined measurable aims and objectives which link to any wider organisational strategic aims.

<table>
<thead>
<tr>
<th>Criteria</th>
<th>What this means</th>
<th>What this might mean in practice</th>
<th>Health sector context and examples</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Management and staff are able to describe and give examples of measurable aims and objectives of the service and how they link to the wider organisational strategic aims. Managers and staff can describe how they are involved in developing the aims and objectives.</td>
<td>Your organisation needs to demonstrate a clear understanding of where it is heading, how it is going to get there and how you will know when the destination has been reached. Milestones that are used to monitor progress will need to be clear so that you can explain how all the services that you deliver link to the wider organisational strategy.</td>
<td>The matrix Standard recognises the pressures faced by the health sector and its flexibility means that it may not involve any extra paperwork. The matrix Standard can help the health employer identify and communicate its top level workforce development objectives and provide the framework to realise planned outcomes. Some health organisations are very large and it may not be practical initially to take a ‘whole organisation’ approach to the matrix Standard. It may be more appropriate that a departmental approach is a better option. For example, a Training department may find that the matrix Standard supports departmental outcomes and thus decide to seek accreditation as a department. Their plans and outcomes will, in turn, fit into the organisational development plans and strategic aims. There are some strong linkages between element one of the matrix Standard and the NHS Leadership Framework. Consider your service’s operational plan and work stream plans. How are these linked to the wider organisational strategic objectives? The measurable aims and objectives may be defined within the health organisation’s Widening Participation Strategy, Workforce Development Plan or Learning and Development Strategy. For example: Service aim example: To develop careers pathways for staff within bands 1 to 4. Service objective: To provide targeted support to 100 staff within bands 1 to 4.</td>
</tr>
<tr>
<td>Criteria</td>
<td>What this means</td>
<td>What this might mean in practice</td>
<td>Health sector context and examples</td>
</tr>
<tr>
<td>----------</td>
<td>----------------</td>
<td>----------------------------------</td>
<td>----------------------------------</td>
</tr>
<tr>
<td><strong>1.2</strong></td>
<td>The service is provided with clear leadership and direction.</td>
<td>Managers can describe how they lead and direct people. Staff can describe how well managers lead them to deliver the service.</td>
<td>Your leadership team has effectively communicated what the organisation is striving to achieve and how this relates to the service or services being delivered.</td>
</tr>
<tr>
<td><strong>1.3</strong></td>
<td>The organisation implements policies to promote equality and diversity, impartiality, confidentiality and professional integrity.</td>
<td>Managers and staff can describe and give examples of how they promote equality, diversity, impartiality, confidentiality and professional integrity.</td>
<td>Ensure you can demonstrate how these core policies and practices are effectively implemented. Can you and your team describe what quality assurance methodologies are in place to ensure that these policies and practices are reviewed and kept up to date?</td>
</tr>
<tr>
<td><strong>1.4</strong></td>
<td>The organisation complies with existing and new legislation which might impact upon the service.</td>
<td>Managers and staff can describe and give examples of legislation including how it impacts on the service.</td>
<td>Appropriate legislation is likely to vary depending upon the nature of the service being delivered and the client group. It is important that all staff and volunteers can provide examples of appropriate legislation and how they are updated with any changes. For example can your people demonstrate how the organisation has ensured rigorous safeguarding, and/or how health and safety legislation is an integral part of day to day activities?</td>
</tr>
<tr>
<td>Criteria</td>
<td>What this means</td>
<td>What this might mean in practice</td>
<td>Health sector context and examples</td>
</tr>
<tr>
<td>----------</td>
<td>----------------</td>
<td>----------------------------------</td>
<td>----------------------------------</td>
</tr>
<tr>
<td><strong>1.5</strong></td>
<td>The organisation defines client outcomes and uses them as a measure of success for the service.</td>
<td>Examples of definitions of client outcomes are provided. Managers can describe how they are set and who is involved. They can describe how they are reviewed.</td>
<td>You can describe how as part of your planning process you have identified client outcomes in relation to each service provided. For example in addition to achieving contractual deliverables what other added value benefits do you offer that will have greater impact on the service being delivered. These will have been identified at the beginning of the clients’ journey/intervention. Would your team be able to give examples of how client outcomes have been met?</td>
</tr>
<tr>
<td><strong>1.6</strong></td>
<td>The organisation promotes the service in ways which are accessible to all those eligible to use it.</td>
<td>Managers and staff can explain different methods of how the service is promoted - what works well and why in relation to the eligible client group.</td>
<td>Consider how your service is promoted including how different methods of marketing and promotion have been used to ensure that information about the service is accessible to all clients. Do you have a marketing strategy, a statement of service, a website and/or any other promotional materials that outline your service? Do you know, and can you describe, which promotional activity works best and why in relation to the eligible client group?</td>
</tr>
<tr>
<td>Criteria</td>
<td>What this means</td>
<td>What this might mean in practice</td>
<td>Health sector context and examples</td>
</tr>
<tr>
<td>----------</td>
<td>----------------</td>
<td>---------------------------------</td>
<td>----------------------------------</td>
</tr>
<tr>
<td>1.7</td>
<td>Clients and staff influence the design and development of the service.</td>
<td>Service design and delivery reflects the views and experiences of staff and clients. Staff and clients are able to describe how they are involved in the design and development of the service and give examples of how they have influenced both.</td>
<td>Do you ensure there are opportunities for clients and staff to influence the service? For example do you capture the views of clients and staff via questionnaires or focus groups? What do you do with this feedback to help shape the current service?</td>
</tr>
</tbody>
</table>

Consider the extent to which leaders and managers across the organisation/Trust create an environment in which others have the opportunity to contribute.

Consider whether you:
• Provide encouragement, and the opportunity for people to engage in decision-making.
• Respect, value and acknowledge the roles, contributions of staff and service users.
• Are able to show how by delivering quality Information, Advice and Guidance to staff there may be a link to how staff deliver an improved service to patients.

Consider how you seek feedback from those that deliver and use the service to help shape its future development. For example some health employers show how clients informed service practices through learner voice activities which culminates in a "you said we did" approach.

Development days and team meetings may provide some examples of how staff have been listened to, their suggestions considered and where appropriate acted upon to improve service delivery.

How are those using the service informed of improvements due to their feedback?
<table>

<th>What this means</th>
<th>What this might mean in practice</th>
<th>Health sector context and examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.8 The organisation establishes effective links with other appropriate partnerships and networks to enhance the service.</td>
<td>Managers and staff are able to describe how they establish links with other partnerships and networks and measure the effectiveness of the relationship. Representatives from partnerships and networks are able to give examples of how well their relationship is working with the service.</td>
<td>Can your people describe how and why they have established links with other partnerships and networks? What is the added value of the relationship? How do you measure the effectiveness of these partnerships and networks in relation to strategic and operational activities?</td>
<td>Many health sector organisations work in collaboration with a network of training providers and local colleges to ensure cost effective high quality delivery. How do you measure the effectiveness of these networks and partners? How does the collaborative arrangement improve your service? As a NHS leader or manager you are likely to be working in partnership with patients, carers, service users and their representatives, and colleagues within and across systems to deliver and improve services. Consider examples you have that demonstrate when and how you: • Identified and acted upon opportunities where working in collaboration with others within and across networks would bring added benefits • Created opportunities to bring individuals and groups together to achieve goals • Promote the sharing of information and resources - Partners could also have a voice and their opinions could help measure the effectiveness of partnership working.</td>
</tr>
</tbody>
</table>
### ELEMENT 2  
Resources  
*This element describes the assets invested and applied in providing an effective service*

<table>
<thead>
<tr>
<th>Criteria</th>
<th>What this means</th>
<th>What this might mean in practice</th>
<th>Health sector context and examples</th>
</tr>
</thead>
</table>
| **2.1**  
The organisation uses its resources effectively to deliver the service. | Managers and staff are able to explain what resources – including human, physical and financial are needed to deliver the service. Managers and staff are able to explain how the level of resource, in relation to client needs, are established and can give examples of how effectively resources are used. | As part of the planning process can you demonstrate that you ensure sufficient resources are available to deliver the service? For example when providing services on an outreach basis you may want to consider how staff are supported with appropriate equipment to ensure their safety. | Within the health setting consider how you can demonstrate that resources are used efficiently and safely, and reflect the diversity of needs.  
Think of examples that demonstrate how you:  
• Accurately identify the appropriate type and level of resources required to deliver safe and effective services  
• Ensure services are delivered within allocated resources  
• Minimise waste  
• Take action when resources are not being used efficiently and effectively |

| **2.2**  
Clients are provided with current, accurate and quality assured information which is inclusive. | Clients and staff are able to describe and give examples of the types of information they were able to access and explain how appropriate it was to their needs. Managers and staff are able to describe what quality assurance systems are in place to ensure information is current, accurate and is written in plain language, free from bias and takes account of diversity.  
Managers and staff delivering the service are able to explain how they support clients and how the resources they use are quality assured. | Consider your paper based and electronic resources. Are licenses up to date?  
Have you reviewed the materials on an annual basis to ensure version control and also that there is access to current labour market information, occupational job profiles and training and provider prospectuses? | Information sources may include the training directory, a virtual learning environment with resources that are managed centrally as well as details of appropriate websites.  
Possible sources of information could include:  
• Job profiles within the next step website – the future National Careers Service website.  
• Information on local support agencies e.g. CAB, Relate etc.  
• An understanding of career pathways for the health sector and knowledge of the Qualifications and Credits Framework (QCF). |
<table>
<thead>
<tr>
<th>Criteria</th>
<th>What this means</th>
<th>What this might mean in practice</th>
<th>Health sector context and examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.3 The organisation defines the skills, knowledge, competencies and qualifications, in line with current national recognised professional qualifications and frameworks, for individual staff roles, linked to the aims and objectives of the service.</td>
<td>Managers can describe and give examples of how they identify and define the skills, knowledge and competencies of staff roles linked to achieving the aims and objectives of the service. Managers and staff can describe the qualifications and frameworks which are appropriate to their role in delivering the aims and objectives of the service. For careers guidance staff in England this should include professional standards and qualifications determined by the Careers Profession Alliance or other representative bodies.</td>
<td>Reflect upon your staff and their skills, knowledge, competencies and qualifications. How do these compare to professional standards and recent changes, for example within the Qualifications and Credit Framework?</td>
<td>There could be a dedicated, managed learning and resource area in the organisation to access resources. This links directly back to criteria 1.1. The service you are intending to deliver will determine the nature of the skills, qualifications and competencies you and your staff will need to demonstrate. One Trust has included the knowledge, skills and qualifications needed to deliver effective Information, Advice and Guidance within the Knowledge and Skills Framework (KSF) job outlines.</td>
</tr>
<tr>
<td>2.4 Staff are supported in undertaking continuous professional development and provided with opportunities for career progression.</td>
<td>Managers and staff can explain and give examples of how they are supported in continually developing their skills, knowledge and competence including any appropriate qualifications for their role. Managers and staff are able to describe how they are involved in the process of identifying their needs and appropriate learning and development activities. Career progression opportunities include those that are both internal and external to the organisation.</td>
<td>Examples here could include short courses (such as motivational interviewing techniques or using career aptitude tests with client groups), shadowing and peer observation of service delivery.</td>
<td>Consider how as a manager you effectively use the KSF approach or appraisal system to: Review the performance of the team members to ensure that planned service outcomes are met Support team members to develop their roles and responsibilities Are your staff able to: Cite examples of Continuous Professional Development (CPD) – this can be CPD in the widest sense and include examples like networking, attending meetings, courses etc. Explain relevant career progression pathways within the health sector</td>
</tr>
<tr>

<td>Health sector context and examples</td>
</tr>
<tr>
<td>----------</td>
<td>----------------</td>
<td>---------------------------------</td>
<td>-----------------------------------</td>
</tr>
<tr>
<td><strong>3.1</strong></td>
<td>The service is defined so that clients are clear about what they might expect.</td>
<td>Managers and staff are able to define the service offering, in relation to their client group including prospective/potential clients and give examples how they ensure clients understand the service offering. Clients can describe and give examples of how they know what to expect from the service.</td>
<td>Your staff can provide examples of how they ensure clients understand possible outcomes that can be achieved by the services delivered. Clients can describe and give examples of how they know what to expect from the service as explained to them at the beginning of their journey. Consider how you ensure that the workforce development or Information, Advice and Guidance service is clearly defined. How do you know that potential service users across the health sector understand and what they can expect? This links back directly to criteria 1.1 and 1.5, what service do you intend to provide and what are the intended outcomes for those receiving the service? For example, if your aim is to ensure new recruits receive Skills for Life support, do you explain this clearly and describe the service you offer to help achieve this e.g. initial assessment and 1-1 Information, Advice and Guidance interviews.</td>
</tr>
<tr>
<td><strong>3.2</strong></td>
<td>The service is delivered effectively to meet its aims and objectives.</td>
<td>Managers and staff can describe and give examples of how effective service delivery has been in meeting the aims and objectives. They are able explain what has worked well and why, with measurable examples linked to objectives.</td>
<td>Your people can describe how services that have been delivered were delivered as defined within criteria 1.1.</td>
</tr>
<tr>
<td><strong>3.3</strong></td>
<td>The service provided is impartial and objective.</td>
<td>Managers and staff are able to describe how they ensure the service is impartial, free from bias and objective. Clients can describe how they are made aware of any potential conflicts of interest in the advice provided and understand the limitations of the service.</td>
<td>What do you do to ensure that your services delivered are free from bias? Consider how you would explain to an Assessor that the service delivery is centred upon the individual and their needs and goals. You may wish to show examples of client outcomes and destination data to emphasise the breadth of progression pathways/ impartiality.</td>
</tr>
<tr>

</table>
**ELEMENT 4**

**Continuous Quality Improvement**

*This element describes the way in which the service provided is reviewed and performance improves as a result.*

<table>
<thead>
<tr>
<th>Criteria</th>
<th>What this means</th>
<th>What this might mean in practice</th>
<th>Health sector context and examples</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>4.1</strong></td>
<td>The organisation measures and evaluates the service against its stated aims and objectives and identifies improvements.</td>
<td>There are strong linkages between this criteria, 1.1 and 2.2. Linked together, the criteria help to demonstrate the organisational plan, do, review cycle. Consider how effectively your managers are able to explain and give measurable examples of how the aims and objectives outlined within 1.1 have been met. Can your team(s) explain how relevant feedback methodologies gained from the service delivery have informed the future planning and review processes.</td>
<td>How are you measuring the difference made as a result of providing Information, Advice and Guidance on learning and development opportunities? For example do you explore the return on investment? What works well and why? How do you know? Some health organisations have introduced distance travelled questionnaires for service users and their managers to look at a before and after Information, Advice and Guidance viewpoint on an individual’s progress and performance. Are you able to show any linkages to how a more competent and skilled workforce is improving patient care? One NHS Trust’s Training and Development service has developed Rapid Plan Improvement Workshops. These workshops focus upon a specific area that has been measured and agree an effective solution or plan of action to help ensure progress and achievement of defined aims and objectives. One Trust showed how their NHS Workforce Scorecard measures the contribution of staff performance reviews and KSF support activities to service improvement.</td>
</tr>
</tbody>
</table>

<p>| <strong>4.2</strong>  | The organisation monitors and evaluates client outcomes to support and improve service delivery. | There are strong linkages between this criteria, 1.1 and 1.5. The linkage of the criteria helps to demonstrate the client’s journey and the outcomes realised. Can you show how your monitoring cycle and reports link to improvement plans? | Some NHS Trusts that deliver a suite of training solutions produce Quality Improvement Plans. These QIPs help monitor projects and outcomes and actions are planned to further improve results, achievements and seek to maximise the impact of Information, Advice and Guidance. How do you know you’ve made a difference to IAG service users? Do you measure the distance travelled? |</p>

<tr>
<td>4.3</td>
<td>The organisation evaluates feedback on the service to build upon its strengths and addresses any areas for improvement.</td>
<td>There are strong linkages between this criteria, 1.1, 3.2 and 4.1. Can your people explain how all forms of feedback and evaluation are used to demonstrate improvement? Do you have access to the analysis of your client surveys? Can you provide examples that show measurable outcomes and links to service improvements? Can you review and evaluate all formal and informal comments on the service and take appropriate action as a result?</td>
<td>See 4.1 above What examples do you have of: • Acting on feedback from staff, patient, carers and recipients of Information, Advice and Guidance. • Identifying workforce/healthcare improvements and creating solutions. • Appraise options, and plan and take action to implement and evaluate improvements.</td>
</tr>
<tr>
<td>4.4</td>
<td>The organisation evaluates the effectiveness of its partnerships and networks to improve the service.</td>
<td>This criteria links to 1.8. Do you review the effectiveness of partnership and network feedback to inform future improvement areas? For example, an organisation may evaluate a partner organisation that is frequently used for an added value service to look at the impact this additional service brings to the target audience.</td>
<td>A Trust’s Learning Centre may have strong working relationships with local commissioning groups, Skills for Health, local colleges and skills academies. To fully meet this criteria the organisation will need to explain and show that partnership effectiveness is evaluated to improve the service.</td>
</tr>
<tr>
<td>4.5</td>
<td>The organisation defines quality assurance approaches which are used to improve the service.</td>
<td>Can you define what relevant quality assurance methodologies are used to measure service improvement? How are your staff kept informed of policy and procedures updates?</td>
<td>What quality assurances approaches do you have? You may have self-assessment reports and quality improvement plans? Do you conduct observations of staff carrying out initial assessment, inductions and learner reviews? Perhaps there is an internal verifier function which includes reviewing learner support Information, Advice and Guidance practices.</td>
</tr>
</tbody>
</table>

Managers and staff are able to explain how all forms of feedback and evaluation information are used to establish areas of strength and areas for improvement. Clients are aware of who to contact with a compliment, comment or complaint and the process the organisation will follow in dealing with them. Managers and staff are able to explain how complaints are recorded, investigated and what action is taken.

Clients, staff and other stakeholders are able to describe the evaluation process and give examples of how the information is used to improve the service. Examples should show measurable outcomes and link to improvements.

Managers and staff are able to describe how the service is quality assured and what plans, policies, procedures and/or processes are in place and how they are implemented.
<table>
<thead>
<tr>
<th>Criteria</th>
<th>What this means</th>
<th>What this might mean in practice</th>
<th>Health sector context and examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.6</td>
<td>Staff performance, linked to their role within the aims and objectives of the service, is reviewed and evaluated to improve the service.</td>
<td>Can you and your team give examples of how they receive constructive feedback on their performance regularly and when appropriate? Can you describe how you are involved in contributing to the success of service aims and objectives and what impact this has had on service improvement? The staff performance outcomes of review and evaluation practices are used to inform your future planning activities.</td>
<td>Consider how you review the performance of the staff that deliver Information, Advice and Guidance and support. Do these staff feel supported? What examples do they have of how their appraisal or performance review has been acted upon to improve IAG delivery?</td>
</tr>
<tr>
<td>4.7</td>
<td>Effective use is made of technology to improve the service.</td>
<td>What improvements have been made to your service that relate to the use of technology? How effective have these been and how do you know? Staff and clients should be able to describe what technology is effectively used to deliver your service. For example are you maximising social networking opportunities?</td>
<td>For example do you provide any Information, Advice and Guidance or other support on the Trust’s VLE? Do learners use e-portfolios? You may use webinars or video case studies such as A day in the Life of a Mental Health Nurse. Do Union Learning Reps have access to unionlearn’s climbing frame?</td>
</tr>
<tr>
<td>4.8</td>
<td>The organisation continually reviews improvements to help inform the future aims and objectives of the service.</td>
<td>This criteria is the overarching business review cycle that closely relates to 1.1, 1.5 3.2, 4.1 and 4.2, and 4.3. What evidence or examples do you have to show your Assessor of ‘plan, do, review’ at an organisational, service and client level? You may for instance have Self-Assessment Reports and Quality Improvement Plans. Can you provide examples of what has changed or improved as a result of these review activities?</td>
<td>This brings everything together all the evaluation activity in order to inform future planning. How is the Trust/organisation facilitating transformation: What examples do you have of how the change processes is leading to workforce developments and/or improving healthcare as a result of the delivery of Information, Advice and Guidance?</td>
</tr>

Glossary of key words

A

**Aims**
The overall goals intended to be achieved by the service

**Approach/Approaches**
The way or ways in which something may be carried out

B

**Conflict of Interest**
A situation where a staff member can influence a client’s options and has a vested interest in which choice he or she makes

**Continuous Professional Development (CPD)**
Training and development for staff to ensure they maintain, improve and broaden their knowledge and skills throughout their careers

C

**Clients**
This refers to people who access the ‘service’ whether they are employees of the ‘organisation’ or external users of the ‘service’

**Confidentiality**
The act of keeping personal information about clients private and not disclosing it to others

**Competence**
The skills, knowledge, experience and personal qualities of all those delivering the service who may do so as paid employees or volunteers

D

**Defined**
Precisely stated

**Design and Development**
For example the approach taken to ensure clients and staff influence the range of services provided, the hours, premises and information resources, types of technology available

**Direction**
The leadership and management of a service in relation to priorities and changing external factors

**Diversity**
The presence in one population of different genders, and a wide variety of cultures, opinions, ethnic groups, disabilities, beliefs and socio-economic backgrounds

E

**Effective**
A productive and workable approach brought about for a purpose

**Equality**
Equal treatment of clients and staff irrespective of factors which might make them differ from one another

H

**Health and Well Being good practice award**
Encourages employers to focus on the health and wellbeing of their employees. This award is available to businesses that have been able to meet a wide range of criteria for health and wellbeing.
Impartiality
The capacity to provide a service to people that is based solely on their needs and not any vested interest of the provider. In practice there may be factors which can influence the choices available to clients, including limitations of information or its inherent bias as well as restrictions on provision imposed from outside. In such cases best practice requires the service provider to make any such limitations clear to people and ensure they understand their implications.

Improving Working Lives
Sets out a series of performance standards for NHS employers. The standards are designed to improve the working lives of NHS employees and are an integral element of the NHS Plan.

Inclusive
Enables, where possible, all to access the service irrespective of any physical/mental impediment, gender or race.

Induction
A formal introduction on entry into a position within an organisation, including people new to the organisation or new to a role within it.

Investors in People
A flexible, tailored and easy-to-use people management standard that helps organisations to achieve business objectives by developing and harnessing the skills of their people.

Knowledge and Skills Framework
A competence framework to support personal development and career progression within the National Health Service (NHS) in the United Kingdom.

Leadership
The provision of guidance and inspiration (see also direction).

Leadership Framework
Provides a consistent approach to leadership development for staff in health and care and represents the foundation of leadership behaviour throughout the NHS.

Lean Management for Health
Effective resource management. Successful lean healthcare efforts result in measurable improvements in patient outcomes: improved quality, less harm due to preventable errors, better access, shorter waiting times, and better service.

Legislation
Laws which might impact on the service such as health and safety, safeguarding, equality, data protection, freedom of information.

Measurable
Outcomes or results that demonstrate progress against objectives and can be used in the evaluation of service provision.

Networks
A number of organisations working together.

NHS Constitution
Brings together in one place details of what staff, patients and the public can expect from the National Health Service.
Objectives
Objectives are targets that the service sets itself in order to achieve its overall aim(s). Targets may be short, medium or long term. They should be specific, measurable, achievable, realistic and time-bound (SMART)

Organisation
This refers to the body which manages, administers and delivers the service and has applied for initial accreditation or accreditation review against the matrix Standard

Outcomes
Outcomes are a measure of the impact that the service has on clients. Outcomes may include ‘hard’ measures such as clients progressing into further education/training or employment, and ‘soft’ measures such as improved confidence, time-keeping

Partnerships
Groups of partners and/or networks that come together to provide complementary services that enhance the overall provision to end-users

Policy/ies
A general approach (may be in writing) taken to address the issue in question. A policy defines why a particular approach is taken

Procedure/s
A description (may be in writing) of how an activity will take place

Process/es
A description of related activities to achieve a certain outcome, usually in writing though may be observable

Professional Integrity
This refers to the maintenance of high professional standards and a determination to do what is right for the client

Promote
To advertise, raise awareness or inform people about the service

QIPP
A large scale transformational programme for the NHS, involving all NHS staff, clinicians, patients and the voluntary sector and will improve the quality of care the NHS delivers whilst making up to £20billion of efficiency savings by 2014-15, which will be reinvested in frontline care.

Quality Assurance
The process of systematically monitoring and evaluating the various aspects of the service to ensure that standards of quality are being met

Referral
This is where the client is directed to an alternative or complementary agency, which may be better able to meet their needs. There is usually some exploration of client needs and discussion about the kind of service required. There is also typically a follow up with the referral agency about the outcome of the referral process

Resources
The physical materials (for example, premises and equipment), finances and human skills used collectively
**Service**
This is the information, advice, support and/or guidance provided by the organisation to support individuals in their choice of career, learning, work and life goals.
Providing information to a client about alternative and/or complementary services, organisations, or partners.

**Skills for Care**
The Sector Skills Council for Care ensures that England's adult social care workforce has the appropriately skilled people in the right places working to deliver high quality social care.

**Skills for Health**
The Sector Skills Council for Health helps the whole UK health sector develop a more skilled and flexible workforce to help improve not just productivity but also the quality of health and healthcare.

**Skills, Knowledge, Competences, Qualifications and Frameworks**
The requirements defined as necessary for a specific role.

**Stakeholders**
Individuals, groups and organisations that have a vested interest in the service.

**Strategic Aims**
Long term goals or objectives defined by the organisation.

**Technology**
The use of equipment such as computers and software packages to support the service delivery.
